Independent Analytical Laboratory

April 17, 2014

To: United States Environmental Protection Agency

We, OMIC USA Inc., analytical laboratory, truly state that Metazosulfuron, as standard test solution, is being imported to determine its value for R&D/laboratory analysis purposes and no benefit of pest control is expected to result.

We will use these standard test solutions to analyze its value on food, and the projected date of completion is July 31, 2014.

There is no specific point of distribution en route to the pesticides ultimate destination, and the ultimate destination is OMIC USA Inc., 3344 NW Industrial St., Portland OR 97210. We plan to use all of these standards and not to dispose of leftover stocks.

Also we truly state that the labels we provide to U.S. EPA is a true and correct representation of the label that will accompany the R&D pesticides throughout it's distribution and analysis at the ultimate destination, OMIC USA Inc.

Sincerely,

Masatoshi Fujimura

Assistant General Manager
